QRP-L Digest 2630

Topics covered in this issue include:

- 1) [130864] Re: Eudora
by David Hinerman <WD8CIV@worldnet.att.net>
- 2) [130865] Re: WTB Yaesu FT-817
by "Mike Yetsko" <myetsko@insydesw.com>
- 3) [130866] Re: [Re: BB condx :<]
by "P.Ermisch" <ermisch@usa.net>
- 4) [130867] 30 M
by "Jim Stamper" <jstamper@shentel.net>
- 5) [130868] K0EVZ FOX Log v.1.0
by "wilford lindsey" <dock0evz@earthlink.net>
- 6) [130869] Solar Activity
by Chuck Adams <k7qo@earthlink.net>
- 7) [130870] OOPS...AA4LR
by "wilford lindsey" <dock0evz@earthlink.net>
- 8) [130871] July 27 NJQRP meeting - long
by "Joe Everhart" <n2cx@voicenet.com>
- 9) [130872] K0EVZ FOX Log v.1.0
by "wilford lindsey" <dock0evz@earthlink.net>
- 10) [130873] Confessions of a 1st Class Bumble-D00FUS
by Monty N5FC <n5fc@io.com>
- 11) [130874] Re: K0EVZ FOX Log v.1.0
by Russ Dow <n7dw@earthlink.net>
- 12) [130875] Re: Battery Monitor Circuits no good?
by "Peter A. Bonucci" <pbonucci@slonet.org>
- 13) [130876] Re: K0EVZ FOX Log v.1.0
by "wilford lindsey" <dock0evz@earthlink.net>
- 14) [130877] K0EVZ back from L'viv okay
by "wilford lindsey" <dock0evz@earthlink.net>
- 15) [130878] CLARC Hamfest
by "Stephen H. Ponder" <n5wbishp@blkbox.com>
- 16) [130879] Canada trip upcoming
by hamjoel@juno.com

Bruce,

I use Eudora for all my email except at work (where the company IT department has dictated otherwise). The current version of Eudora Pro, in the "light" (free & adless) configuration, does everything I need. While the light config doesn't handle multiple mail accounts directly, it's a simple matter to set up an additional directory for each account and set up a shortcut to the Eudora executable file to be run in that directory. (The process is described more clearly in the Eudora help files.)

Dave

They are still holding at \$629 at Gigaparts...

Is that the cheapest new?

:) Hmmm, well I swear I copied N5FC and a BB number so perhaps I'm not the
only one. Enough embarrassment here for everyone...

FWIW 5K0Z (San Andres Island) is calling CQ at 10.102 listening up 2.
Answered my 5W. About 9PM EDST.

Up a bit LZ1QI is also calling CQ.

Gang:

Here is the first draft of my log for the FOX hunt last Thursday evening.
Please look it over and send me any corrections. In a couple of cases
there are blanks in the log, as I just could not make out my notes. Had
just returned from Ukraine less than 24 hours before, so fatigue and jet
lag were definite factors.

Gang,

Someone posted about band conditions.

Well. I went over to

<http://www.dxlc.com/solar>

to look at the conditions. From the update to the
web page from 0610UTC today:

Solar Flux: 240

Sunspot Count: 320

A-Index: between 16 and 20.

So as long as the A-index is high the news is not good,
but watch for great band conditions when the A-index drops.
So don't turn off the rig for the next few days.

FYI,

Chuck Adams, K7QO CP-60 k7qo@earthlink.net
<http://www.qsl.net/k7qo>

Moving to Arizona? --- Bring your own water, please.

The usual monthly NJQRP meeting today in Princeton, NJ was well attended by 26 enthusiastic QRP'ers and interested parties.

The rough theme was a "sell-for-cheap", barter or give away

session to help redistribute everyone's stock of parts, excess equipment and pelf. Lots of stuff was recycled including a *whole* bunch of Altoids tins! Hint - when you are giving away parts have a pile of Altoids boxes handy. No one balks at taking a box when it has an instant use...

Two PAC-12's were shown. Ed, W2MGM has his own wrinkles on a neat package with a sturdy base that fits in a small carrying case. Joe N2CX demonstrated another version with mods to use "fixed mobile" while on the road for business.

There were a number of discussions going on the topic of maximizing efficiency of short verticals and the perennial topic of "how many radials do I need and how long should they be?" Alas Dr Megacylce was not present to fill us in!

Several folks once again showed off their creative handiwork including the Manhattan SOP by Mike - KB3HMR that is a featured article in the latest QHB.

There was a short presentation on an upcoming article by N2APB on the QuickieLab. It is a smaller brother to George's QRP Digital Breadboard and will be written up shortly in the QRP Quarterly. Collaboratively George and Joe, N2CX will have a series of ham-related applications and maybe even a partial kit by NJQRP. Using a Basic STAMP, the QL will make programming of simple projects well within the abilities of the average ham. A sample project, the Morse voltmeter was demonstrated.

Gerry - N2GJ gave a short description of his use of the Anderson Power Pole power distribution system and how he had installed it in his shack and car for instant connect/disconnect of power to any of his rigs. He stressed the advantage of standardizing on power connections among a variety of rigs rather than the usual collection of incompatible connectors.

David - N0YMV talked to several of us about his ideas for expanding the PSK-31 beacon to other modulation types, etc. He's got some good ideas for expanding this far beyond its original intended use!

TTFN

Joe E., N2CX

Attendees:

Tony - W2GUM, Ken - N2CQ, Lenny - W2BVH, John - KE3SS, David - N YMV,
Gerry - N2GJ, Bryan - AA3WM, Benjamin - KB3GOU, Stan - KC2HDR,
Ed - K2MGM, Ted - W2TAG, Herb - K2HPV, Al - K2PJT, Mike - KB3HMR,
Rich - K2GWH, Howard - N3FEL, Bob - WB2RJC, Richard - WB2ZKW,
Gene - AA2Y0, Ira - KB3FYB, Steve Markowitz, Dennis - AB2PD,
Larry - WA2DGD, Doug - KA2UPW, Ron- W2IOL and Joe - N2CX

HAW!

4 mile hike, new portable antenna, K1 on batteries, sunburn and chiggers...
4 hours calling CQ BB - very few answers...

WHAT? Bumblebees is Sunday? SUNDAY?!

Sad thing is, you'll probably have to do without BB # 133 tomorrow...

I did manage to have a great ragchew on 30, after the "contest"

OK, stop chuckling...

71 (yeah, one short),

monty N5FC

Hey Doc!

We knew you were going to Lviv, and then today they had a terrible plane crash at an air show there. I had visions of you in the crowd, hopefully only as a witness.

Glad you're back and okay. *Whew!*

Darrol is right. That circuit is useless.

If you where to replace R2 with a zener, then you might have something.

If you hooked the 741 up as a schmitt trigger, that would be even better, but then it would be a completely different circuit.

Russ:

Sure appreciate this note. Yep, we left L'viv only this past Monday afternoon. My wife was looking out the left side of the commercial airliner and saw a group of fighter aircraft. Could be that one of those was the one which crashed. We have lots of friends in L'viv, also, and are praying that none of them were lost in the tragedy. for me, sure is good to be back.

Gang:

Several have written, wondering about our being back from L'viv. We spent about nine days there, and have many close friends in the city. Don't know whether any of them were lost in the aircraft crash (air show) today. Sure hope not. We departed from that very airport just this past Monday

afternoon. My wife Holly a group of fighter aircraft parked on the airport while we were climbing out on our flight to Warsaw. Perhaps one of them was the one which crashed.

Anyway, it was a great trip and we had a good time. It is even greater to be back in the good old United States of America. Thanks one and all [g].

I was told I will be going to Canada in August...
what are the ham agreements
does anyone have to use their band assignments etc....
we are going camping, getting out with the wild life. snuggling a bit
closer to rugged nature....and maybe K2ing also....
What a crock, work the doc, from Campobello Park... in Canada.... any
ham folk around that area? sailplanes, hanggliders.....
having said and asked this and that, I will say by...

ke1lla joel
in Maine
going even better
north.....

It is similar to the circuit I mentioned that I'd simulated a couple of days ago. I used a zener, of course, and added an R for +ve feedback to give some hysteresis.

Well, from my whining post about crummy conditions I did learn something. I didn't know the A index was only updated daily. When I looked at it it was around 11-13,

high,
but not TOO bad. But I guess it was really higher.

Well, worked a few of those IOTA guys, anyway.

It's really charming that you have so much faith in your one watt wonder! The bands are dead. This has been posted many times on the list! Do something else: go for a bike ride, or walk the dog, or take the kids to the mall. They will get better. It is not a secret conspiracy against you!

Since I wasn't there, I can't say. What side of the bed did you get up on? Your answer is just what I would have expected from you!

Believe it or not, this list does have a lot of newbies who don't have all the experience in the free (or any other) world! Sometimes they think since they built it and paid for it it should work all the time! I think it is necessary to enlighten them a bit!

Your answer added no intelligence to the topic, but then yours never do!

Incidentally, I thought learning was one of the purposes of this list. This old fart learned, because of my asking about propagation conditions yesterday, that the A index is not as current as I thought. I realize other old farts know it all, and have no need of further knowledge, but I was pleased to find that little tidbit.

John,

The US Air force keeps a report of A and K indices with running averages at

<http://solar.sec.noaa.gov/ftpdir/latest/MAhr.txt>

The report is updated every 3 hours, with estimates provided for each hour in between. It's fun to watch the K-index spike when the output of a big flare comes by.

There's a graphical version of the planetary K-index, too, at

http://solar.sec.noaa.gov/rt_plots/kp_3d.html

that is based on the 3-hour updates.

Joel

I don't think the frequency agreements are gonna be the problem ... it's learnin to talk Canajien that will be the problem. You're gonna have to learn to say things like 'Eh' and 'runners' and 'chesterfield' (tho maybe in the woods you won't see to many of them). Of course, you're close to PQ and if you're going there, they got laws against talkin 'murican. But, I spose if you talk south Louisiana it should be ok.

Yesterday the wife and I were wandering the local Hastings book and music store and found a discount table filled with junk, One item I could not help but pick up was a radio control 9.6v battery and charge kit for \$7.50.

The kit claims to be a 650mAh 9.6V by Enertec, The supplied wall wort is a 12 volt out at 200 ma.

This little Nicd pack is only about 1/4" larger than a Altoid tin and is as thick as a AA battery "8 wrapped together".

With the proper connector would this make much of a supply for say a SST or rock mite hiking trip?

Subject: [130897] Ft Tuthill Meeting and fridge magnets
Message-ID: <5.1.0.14.0.20020728165523.00a000e0@mail.earthlink.net>
Mime-Version: 1.0
Content-Type: text/plain; charset="us-ascii"; format=flowed

Gang,

Well a lot of the old gang was back at Tuthill this year and
the weather was excellent (not too hot and no rain on Saturday)
and those that forgot about sunscreen learned yet another
valuable lesson in UV and absorption rates at high altitudes.

Jay Bromley, W5JAY, of course, got the greatest deal I have
ever seen on a TenTec rig at the meet on Friday.

I found a clean Heathkit IM2410 counter for \$20 that works!!!
I found some teflon BNC connectors and I picked up the first
set of Ham Radio CDs and that was about it for me. Not one
vendor there with parts like Dan's Small Parts, etc. Bummer
if you need something.

KI6DS, WA6GER, W6MMA, and a lot of the CA crew was

visiting the state. If you need a portable beam for DX-peditions, FD, and other outdoors events then Vern, W6MMA, has a deal for you. I'm going to have to get one for WY trips and SS DX-peditions. May do the Yukon Territory this year for the heck of it..... In fact I think that Vern was the only QRP dealer there other than clubs.

From NM there was NA5N, KK6MC/5/7, and others too many calls that I forget.

I heard some disturbing news from one of the flea market guys that the cost was going from \$30 to \$50 per space for next year. If that happens then Ft Tuthill will be a ghost town next year. A lot of people complained about the \$1 charge for entry, but this will really get them to quit driving to Flagstaff.

Got back home late Saturday and found the furniture back in place after being the garage for over 3 months while a bunch of people fixed and unfixed the floor a couple of times trying to get it right.

This morning I walked up to the fridge and an idea popped into my little brain. The fridge was moved to the living room and back several times and Phyllis had taken down all the magnets so they wouldn't get dropped, etc. When you travel quite a bit over a period of 15 years you collect a few of these puppies. Then it occurred to me upon seeing them for the first time in many moons.

At meetings and joining clubs, etc. most of clubs sell or have lapel pins that we all wear on shirts or caps or stick in drawers or filing cabinets. How about a fridge magnet? Surely they are not much more expensive than the lapel pins and they sure would look nice on the front of the fridge, so I'll give you my mailing address if you start giving them away. :-) No charge for the idea. Also a SWL, Elecraft, TenTec, magnet might look good too.

Well as has been around here the Bands were really bad plus I think my K1 has developed an intermittent receiver sensitivity and noise problem. Probably been beat around in the Backpack and mountain bike too much. Will have to put it on the bench this week. Plus T-storms continuous with really bad static crashes.

Also did an 8 mile hike in the pouring down rain up the mountain from the camper to hide a new Geocache.

Anyway below is a list of contacts. I will be sending QSL cards as soon as film developed to make custom on from this trip.

Pretty interesting from Alaska. Most if not all stations are there for 15-45 seconds and if I don't work them in that window, they are gone. It is hopping all over the northern midwest and the west coast from north to south. There is never more than 1-3 stations up at a

time if that.

This is almost like work...but fun. :-)

Back to the rig, my coffee is done being nuked.

Same even here on East Coast, Jim. Station CQing 599, call, send exchange, and QSB has him nil. Very difficult, but as you say, challenging. WA9TZE and AA4XX are the exceptions...very strong most all the time.

Hello,

I have a brand new set of Schurr paddles, still in the wrapper never removed from the box. The current price for these paddles at morse X is \$190 + shipping. I will sell them for \$150 shipped.

Hello all .. Just a note to those who worked me a week ago while I was on vacation at Cape Hatteras. I usually used an inverted vee and 509 in past years. I was satisfied at the K2 - W3EDP combination. Is it a "good" antenna? Like they say "how's the wife ...compared to what" stands true. I was able through casual operation (less than an hour a day) to work 10 or 11 EU and about 15 states. The antenna went horizontal to the deck on the 3rd floor then to a point about 3 ft off the ground. I did put up the inverted vee on 80 to check in to the MI QRP net and managed to hear some of the fellows but the noise was nasty. The EDP did tune through the K2 tuner on all bands save 15. All in all it was a good week with my wife and family and the weather was excellent even though the solar status was causing problems. Maybe just maybe I'll try the K2 from OM land next summer.

73 God Bless ... Tom KI3R Port Vue PA nr Pittsburgh

PS to W2AGN thanks for the first contact but I was having some difficulty with the antenna connection initially.

Hello,

I have the following FT-817 goodies that I will like to sell. These are
all Brand New, never used.

Maha battery pack MH-FNB-72 - \$ 50 (bought at \$60)

MFJ power Supply MFJ-4103 - \$ 30 (bought at \$40)

If bought as a package I will cover the shipping cost.

I just shut down from the BB event even though there's 10 minutes left...
I could only work 20 mtrs here as constant checking of 40, 15, & 10 mtrs
revealed no signals...

...but I did manage to work 16 stations on 20 mtrs, most of them BBs...a
lot of QSB and sometimes one had to act quickly or the signal was gone...I
worked Jim, AL7FS, from Alaska and he had a great signal into here...

...I was able to work some vry weak signals by going to the filter 4
position on my K2 (100cps) so that was handy...I ran a lot with the 400
cps filter #3...still have to try Spectrogram again...

...my new Yaesu YH-77 headset works well and is very comfortable...

...may thanks to the sponsors....I enjoyed it...now back to some house
painting...

Very challenging. Since was not a bee, just did S&P. Actually, I thought only Bees were supposed to call CQ, but found quite a few non-bees calling "CQ BB." Terrible QSB on 20 and 15, QRN on 40. Only about 25 Qs, and maybe 18 bees.

Works great and looks good with one exception, someone put a small =
on/off toggle switch just to the right of the meter to turn off the =
meter light. Has some scratches on the case, nothing bad, the face is =
fine. (one of the knobs lost the aluminum center disk) I can send a pic =
if interested. Very nice tuner with antenna switching and built in 4:1 =
balun 200/20 watt power scales and SWR meter.
\$70 shipped priority mail in the lower 48 to the first person to respond =
that they want it.....

Thanks=20
Tim

Hi Tom,

I have had great luck with the W3EDP. (Ref:
<http://www.g3ycc.karoo.net/w3edp.htm>)

For example, using my QRP+ while visiting Wisconsin I was checking in with SSB to the MIDCARS net on 40 meters and until I told them I was running about 3 watts PEP, they hadn't noticed. Much impressed were they.

It was set up to run from the tuner, through a crack in a push out window (about 4 feet above the ground) and then up to a tree at about 20-25 feet.

I have had good results on 20 meters also.

73, Jim

The forecast called for thunder showers all afternoon.
Heck with that... I rode my bicycle into the
Pemigewasset flood control wilderness about 3 miles
and set up in a meadow along side of the river. I used
a DSW-20 and a 20 meter dipole up about 30 feet. After

an hour it started to pour rain. Outta there. But, the first hour was a blast. Best DX was VA7NT in BC. Also worked N0SXX in CO and AC5K in Texas. I worked 11 stations, 10 of them were bees. Thanks to all. Jim w1pid@arrl.net

Gangue:

Lot's of fun, but sure could have used better conditions. Most signals were in the noise for me. I wound up with:

66 total QSO's

36 Bees

Total score 7128

As always a thrill and a pleasure to work AK, this time 3 different stations. AL7FS, AL7OK and WL7CDC. I only managed to snag 1 QSO on 15M, N6WG. I never heard even 1 contest station on 40M, so 99.9% of my activity was on 20M only.
